### **Changling** Ari Harper

*Some family secrets change everything...*

In Book 1 of the Circle of Kin series, we met Nera and learned about her extraordinary family secret. Now the adventure continues in Changling.

Nera's best friend Sully knows there is something special about him. He is after all related to Nera's Uncle Jasper and Jasper is a witch so it stands to reason that some family power would have been passed down. They just need to figure out what that power could possibly be.

However, his power is beyond anything they could have imagined and while his ability to change into an animal and run wild has its advantages, to be hunted for the beast that he is, is another matter entirely

And when they find out who wants him dead, they realize that life isn't as simple as they thought...
